Junta Joven

The Young Professionals Chapter of the
Latin American Chamber of Commerce
in Switzerland - LATCAM

www.latcam.ch

What is Junta Joven?

The Junta Joven is a chapter of the Latin American Chamber of Commerce (Latcam) that targets young (or young at heart) professionals, entrepreneurs, and students with a special interest in Latin America. It provides a networking platform where members can exchange experiences, share ideas, gain know-how, and form partnerships that can advance their business projects.

The objective of the chapter is to help members launch business with Latin America, and to assist those engaged in start-up ventures meet the challenges of operating in the region. It also aims to inspire young professionals to orientate their careers to Latin America.

What are the activities of the Junta Joven?

Junta Joven organizes seminars with representatives of companies and organizations, operating successfully in Latin America. These events aim to be interactive - they promote dialogue and exchange with the speakers during the presentations and the networking cocktail.

Junta Joven also organizes a career-day at least once a year. Here participants can inform themselves about career opportunities with companies operating in Latin America and meet with key human resource decision makers.

Junta Joven traditionally hosts an Annual Latcam Christmas Cocktail. All Chamber members are invited to network in an informal atmosphere and enjoy the Latin American food and culture that are part and parcel of this event.
